Digital Signatures

Rinker MATERIALS® *A QUIKRETE® COMPANY*

Sacramento, California

Plants, especially those with multiple inspectors, can face a multitude of document control challenges.

When there is a need to draw on past inspection and test records, legibility, errors and omissions can create confusion and make fact finding and accountability more difficult.

Digital Signatures create a rock solid chain of custody for every document, removing any doubt as to who performed a test or inspection, and when they did it.

Increased Accountability & Confidence. Improving the Quality of the Quality Control
